Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.What is consciousness? What is it made of? How does it work? Why do my conscious experiences feel like they are happening to an individual conscious me ? Can my conscious being survive the death of its physical body-brain? The surprising answers from the emerging science of neurophysics is that the part of you that is conscious is made of light; made of electromagnetic wave energy that is generated by patterns of neuron firings in your brain. Our conscious waveform comes to know reality by causally interacting with electromagnetic information from reality. Our conscious being receives most -- not all -- of its information about reality via the receivers of its body's sensory systems. Our brain's sensory electronics convert this information into the electromagnetic waveforms that our consciousness directly interacts with and experiences as sensory perceptions of reality. A consciousness can receive electromagnetic information more directly via extra-sensory perception. And our neurons generate their own electromagnetic information that we can consciously experience as ideas, images, feelings, etc. Our human body-brain is an exquisitely sophisticated electronic device that generates its own electromagnetic conscious spirit, and provides that spirit with electromagnetic information about this reality that we find ourselves living in. Our human spirit is made of radio wave energy -- the longer slower electromagnetic bandwidth that can be picked up by an EEG and represented as brainwaves on a monitor -- rather than the shorter faster bandwidth of visible light. But electromagnetic waves are elastic. They can be stretched and compressed without corrupting their information structure. When our conscious spirit is compressed and accelerated it can literally become a spirit that is made of visible light. A...
