Mwi-c- -+w- AMtfaahlnortaHne will B l111L author s theories of digestion and nutrition may be a little rigid and ultra, but as a general rule his reasoning is sustained by physiological evidence. His main contention is that normal blood is alkaline, that the processes of digestion are principally alkaline, and that free acids have no place in true food; that the excretions, especially the urine, furnish a reliable means of ascertaining the wants of the system in relation to nutrition. He claims that the office of microbes is to supply food for plants, and as plants feed on inorganic matter prepared by microbes, while animals feed on organic matter prepared for assimilation by digestive processes inside the body, microbes can be of no service to the animal, but may be harmful, and, hence, as far as the. animal is concerned, there is no such thing as distinguishing between microbes, that they are all pathogenic, and should be abolished. Price, \$1.50. ature, we earnestly recommend a perusal of the above volume. The author views all his subjects from an original standpoint, and whether the reader is convinced or not by his...
